Self-motivated recent graduate of Concordia University in math & stat, with 3 years of experience as manager and strong knowledge and passion for programming. Looking for junior software developer position to contribute to the success of the company and to get hands on experience in the industry

🎓 EDUCATION

2014 - 2019 **BA in Math & Stat** (40 Credits from Comp Sc), Concordia University, Montreal, Canada

2009 - 2013 **BA in International Economics**, STS University, Kyiv, Ukraine

👤 EXPERIENCE

05/2018 - Present **Client Relationship Manager**

7 Etoiles, Transportation Company

Handled client-company communication and built lasting relationships with clients and businesses by delivering excellent service. Resolved client-company conflicts and collaborated with internal teams to meet target goals. Maintained constant stream of contracts by analyzing demand and negotiating price

👤 PROJECTS (Self Employed)

07/2020 **Company RESTful API with SpringBoot, MySQL, and Hibernate**

J2EE (STS), ThymeLeaf, PostMan, json, JS, html, CSS

Developed full stack Spring project with custom server-side validation, registration, and authorization. Joined multiple MySQL tables and implemented CRUD and REST API functionality. Added open source random fact and weather APIs. Rendered dynamic web pages with Spring MVC and thymeleaf

03/2020 **MERN Stack Bank Website**

Mongo, Express, React, Node, Redux, Auth0

Created full stack banking and balance tracking website with Google / Auth0 login options and custom multi-level menu animation. Implemented backend mongoose validation and Redux reducer that sets store state depending on type of dispatch call. Added global provider to pass fetched data to children
